A Snapshot of Results

- Almost 500 projects
- Access to **191,000** Software Engineering experts

A US Multinational Technology Corporate Success Story

Our highly-skilled AWS consultants provide quality service thanks to their unique amount of dedication and innovation.

This is illustrated through a recent project with one of our clients, a US multinational technology corporation. The goal was to implement a program to modernize its use of cloud. The business was moving hundreds of applications from legacy onto AWS infrastructure.

The client asked K2 Managed Solutions to help as a specialty IT Cloud recruiting partner. We had to identify and deploy consultants fast. We placed a AWS Architects onto the program straight away and they hit the ground running. Our quick response delivering quality resources gave us a seat at the table for the next round of hiring in March/April 2022.

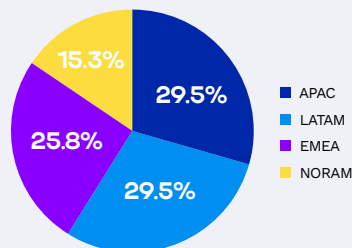

Our AWS Clients

Our talented network of consultants have driven successful AWS projects for some of the best companies in the US. Here's a selection of these organizations:
